DETAILED ACTION

The application is published application number: 2004/0172111. The publication is classified in US 607/101.

The Applicant is requested to provide (or check for accuracy) at the beginning of the Specification updated status information (serial numbers and patent numbers) of all related applications. The effective filing date of this application (tentatively) 1-29-03. Pending claims as of 3-30-06 are 1-12.

Elected (without traverse) claims 1-4 and 11 are examined below.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4 and 11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Very generic claim limitations, "treatment unit", "intermittent output control", "subject tissue determining unit", and "intermittent output setting unit" are vague inherently due to their plain language definitions, AND are

not described in the specification in the manner of which a professional reviewer of patent applications can follow. The applicant appears to be a translation from the Japanese language.
